			New energy activity will support the Georgia in meeting its												
			United Nations Framework Convention on Climate Change												
			(UNFCCC) commitments, while also increasing the country's												
			energy security. It will support Georgia to implement policy reforms that help secure investment in Georgia?s clean and												
			renewable energy; harmonize regulations with the European												
			Union (EU) to facilitate clean and renewable energy trade with												
			neighboring countries and Europe; improve transmission and												
			distribution planning and operations; establish a competitive												
			electricity market; promote clean, renewable and efficient energy technologies; increase the use of clean and efficient												
			energy resources; improve the policy environment to support												
			investments. All this will provide Georgia with critical building												
			blocks and capacity that will help to plan and implement												
			Nationally Determined Contribution (NDC) and assist Georgia					Task

			Label Commune Citoyenne is a quality label designed for											
			Moroccan municipalities that promote good governance practices. USAID has been engaged in a co-design effort of this											
			locally-driven initiative along with the German Development											
			Agency (GIZ), and several local NGOs. While this initiative is											
			about granting labels to communes who meet a certain number of good-governance indicators, the difficulty is to											
			support communes that are nearly eligible for the label but											
			are lacking in one or more principles/indicators. Under this											
			proposed program, USAID could provide the necessary support to some of these communes so that they can meet											
			these principles. The proposed USAID program would focus on											
			the principles of participation and transparency, which are

			The Economic Development, Health and Education Offices												
			propose a jointly-managed integrated agriculture, nutrition,												
			and water and sanitation activity to reduce stunting through												
			agricultural, water and sanitation and behavior change												
			pathways in targeted districts of Zambia. The expected												
			geographic focus will be in Eastern Province, potentially with												
	1	1	selected districts in Central or Muchinga Provinces. Addressing			1		1				1		1	
			stunting requires children and pregnant and lactating women	1											
			are consuming adequate quantity, quality and diversity of food												
			and that adequate health conditions exist for them to												
			biologically utilize what they eat. This requires a complexity of												
			interventions that increase access and availability of safe,												
			diverse, nutritious food (usually relying on home production),												
			adoption of better child feeding and women?s diets, water												
			and hygiene practices to improve food safety and utilization,												
			and access to clean water and a healthier, cleaner												
			environment. This requires a multi-sectoral approach that												
			increases incomes; improves agricultural productivity and												
			private sector led value chain development in nutrient-dense,												
			protein-rich foods; improves access to and availability and												
			utilization of nutritious food, clean water, and sanitation;												
			improves health-seeking behaviors for both the pregnant												
			mother, as well as her child; and promotes essential nutrition												
			and hygiene behaviors, including hand-washing, exclusive												
			breastfeeding, appropriate complementary feeding, child												
			spacing, and hygienic play spaces. The selected agricultural
