

Action Plan For Civil Society Engagement In

FEED THE FUTURE

The U.S. Government's Global Hunger & Food Security Initiative

- Propose 2-3 specific actions that should be highlighted or prioritized within the FTF learning agenda, or related to high profile cross-cutting issues like climate, nutrition or gender, where the USG and the international NGO community can work against a common set of milestones.
- Highlight 2-3 concrete actions that the NGO community and the USG can commit to work on together on that will strengthen local civil society with consideration to building resilience to recurrent crisis.
- Define a common message on the importance of eradicating extreme hunger, malnutrition and poverty that can be reflected across FTF and the stakeholder community and identify new ways to communicate this message frame effectively to the American people.
- Define or adopt a method to gauge the quality of stakeholder engagement in Feed the Future and in focus countries, (e.g. possible adoption of the GAFSP Quality of Participation Guidelines).
- Propose a method for ensuring accountability and transparency from civil society and USG in following up on the workstreams laid out in the final recommendations.
